

# MECC Wi-Fi Guide - Android

1: Navigate to “Settings” on your phone. From Here you will want to select Wi-Fi and Network.

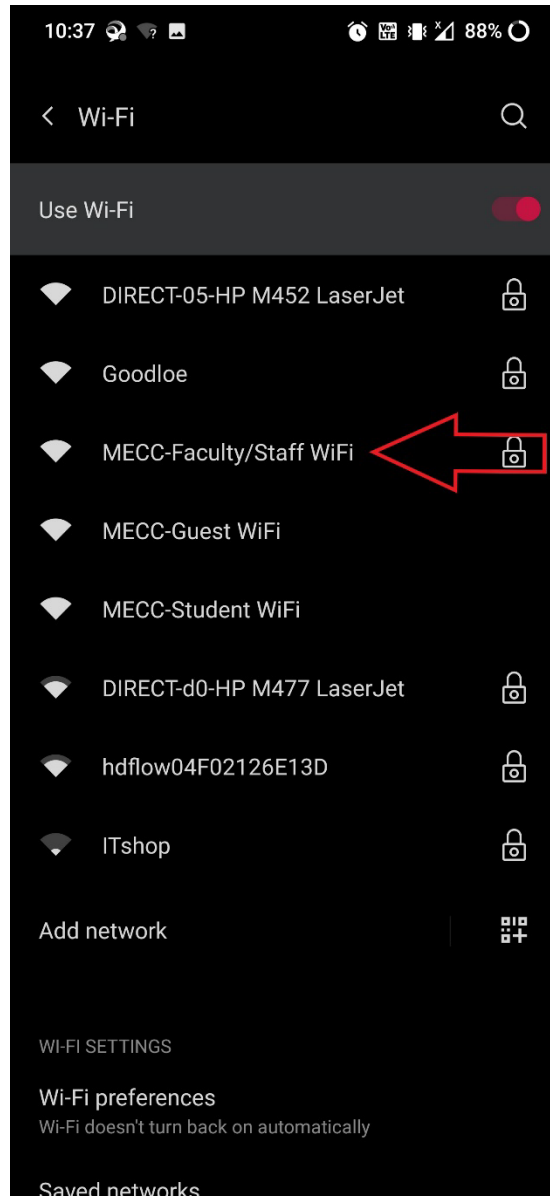

Note: It usually shows up as a picture of a Gear on most android phones.

## 2: Select Wi-Fi

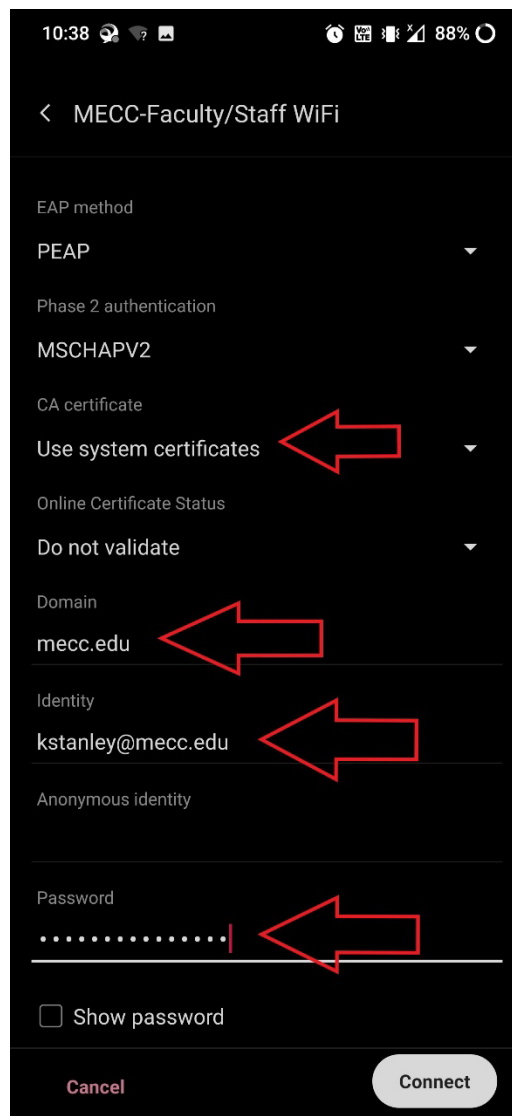

### 3: Select MECC Faculty/Staff WiFi

4: In the screenshot below, some key items are marked.

- a. CA Certificate – Select “Use System Certificates”
- b. Domain – Enter “mecc.edu”. If this field is missing, make sure you have “Use System Certificates” selected. If this is missing, skip this step.
- c. Identity – This is your MECC user account.
  - a. If you have an “me” account name (ex: mestak@mecc.edu), use this here.
  - b. If not, use your regular sign-in. (ex: kstanley@mecc.edu)
- d. Password – Enter your password here. This will be the same as your computer login.

## Questions and Answers:

**Question:** How do I know if I am connected to the Wi Fi?

**Answer:** In the Wifi Menu, it will say “Connected” below the Wi-Fi name (MECC-Faculty/Staff WiFi). If it says “Saved”, You are NOT connected. Its quite possible your password was typed in incorrectly.

**Question:** How can I try to connect to the WiFi again if I mistyped my information?

**Answer:** Go back to the WiFi menu (See Screenshot in step 3) and hold your finger on top of the WiFi name. A menu should appear with the option to “Forget Network”. Select Forget Network and it will allow you to redo all the steps above.

**Question:** What do I do if I still can't connect to the network?

**Answer:** Often it's just an incorrectly typed password. An easy way to verify if you're using the correct information is to go to [webmail.mecc.edu](http://webmail.mecc.edu) and attempt to login to webmail using the same information as you used to connect to the Wi-Fi. If you are still not able to get in, please put in a helpdesk ticket and we will help.
